Comments: I have enjoyed many a great climb through the wilderness areas in the wind river mountains. Fixed anchors do not harm anybody, do not harm any wildlife, do not disturb the area, and are unobtrusive. I see no point in banning fixed anchors, it boggles my mind that this is even a consideration. If this legislation is to go through, some of America's most iconic climbing will be destroyed for no reason at all. Please find the common sense to not go through with this legislation.
