Comments: I do not support the bolt ban. As a long time Yosemite climber and lover of the sierra and eastern sierra climbing . We rely on these to make sure we can ascend and descend a route safely. It's so much safer than using a manky sling wrapped around a tree or a block. As climbers we are stewards of the land and rock we recreate on. For the most part we as a whole can do this safely. The bolt ban will have devastating consequences and be a huge safety risk. We cannot allow this to pass.

Please do not support this dangerous decision
