First name: Ben

Last name: Carter

Organization:

Title:

Comments: Please don't be rid of anchors as they are a vital part of climbing and ensuring that climbers remain safe while enjoying the sport and it would be unreasonable to remove them. Without them it would put people both experienced and inexperienced in climbing at a much greater risk and more likely to harm themselves. America also has a rich climbing and exploratory history and so removing bolts would destroy the history and inhibit further exploration, of these areas.
