First name: Karen

Last name: Thaw

Organization:

Title:

Comments: Allow regular Environmental Impact Statements to be performed/filed with the EPA in order to assess whether this region continues to meet the definition of Wilderness. This would include specific site evaluations, the condition of animals, and how habitat and native animals are impacted. The preservation of Wilderness needs to be the primary mission of this region (Bob) in Montana. Periodic EIS's need to be published, along with specific site complaints in order to allow trekking to continue with some transparency.

Thank you for your time.
