Title:

Comments: Climbing is a great way for us to be in nature, experience some of the most beautiful areas of this country, to connect with people and nature simultaneously. Bolts and fixed anchors do not take from others experiences who come to enjoy nature in their own way. There are newer techniques and methods for bolting that makes them invisible to the eye unless you are the one actually climbing. Fixed anchors and bolts help us in the climbing community be safe and enjoy the outdoors. The climbing community as a whole likes to make sure we leave an area as undisturbed as possible and protect areas that would otherwise not be. I hope that you will rethink seriously about this issue. Have a great day.
