Title:

Comments: Two major comments:

1) Climbing is a legitimate use of wilderness, and as an activity it predates the Wilderness Act. Fixed anchors are an essential part of our sport, therefore banning them makes our sport impossible.

2) Fixed anchors are essential for safety. If the federal agencies prohibit/limit/place unnecessary restrictions on fixed anchors, more people will get hurt and ultimately die while climbing. That outcome will be a direct result of this attempted federal overreach.
