Comments: Hi I'm writing in regards to the fixed anchors proposition. I believe removing fixed anchors would be detrimental for allowing people access to experience the outdoors. I firmly believe that if we could show the beauty of nature to others and give others access to nature. That they will appreciate the value and the beauty that is found in nature and will want to be stewards and caretakers of our planet I hope that we could find a compromise with fixed anchors by either having anchors that have a color that is similar to the rock so it doesn't disturb the aesthetic. We could also limit the amount by just fixing the ones we already having and making a proposal not to have more and just keep and maintain the ones we have. I hope that we could find a compromise so we can help and be stewards and take care of the natural landscape that we have been entrusted in.
