Comments: With the upmost respect, please do not make fixed anchors in wilderness areas prohibited installations. The ability to rock climb in the outdoors provides immense joy for rock climbers all over the world. Prohibiting outdoor climbing anchors, bolts, pitons, etc will make the future of rock climbing unsafe, inaccessible, it limits the exploration of the outdoors and will begin to erase the historic and monumental outdoor rock climbs that mean so much to people. Rock climbing is a sport of community, compassion, determination, love for nature and stoke for existing in this beautiful world we are all blessed to experience. Please do not take away this freedom of climbing vertical rock that brings joy to so many and the opportunity to see the world. Thank you so much for reading this.
