Comments: National parks have been created to protect our land while also allowing people to recreate. There is always talk about how to make it so the recreation can happen safely. By prohibiting fixed equipment you put a lot of people in danger when they go out and climb and explore. Not allowing fixed equipment endangers not only people using it but also the first responders who are now responsible for trying to rescue individuals who used old anchors bc they were not allowed to be replaced. Please, I don't only speak for myself but for my whole community when I say this is not the solution.
