Comments: It is imperative that USFS provide detailed information to disclose which permits, locations, and any other information associated to the Bob Marshall Wilderness Complex. This majestic Complex is a crown jewel of the National Wilderness Preservation System and helps protect one of the LAST great expanses of BIODIVERSITY IN THE WORLD !!

Outfitting and camps have impacts and are easily glossed over or overlooked > including Wilderness trails so HEAVILY used by pack animals that resemble roads, rather than foot or horse trails. Outer campsites in Wilderness are allowed structures like tent frames, corrals, and hitching posts,

ALL of these outfitter impacts are exacerbated by extraordinarily LARGE people and pack stock party sizes, which are currently allowed in the Wilderness

To renew 62 special use outfitter permits that will be in place for at least a DECADE, WITHOUT DISCLOSING THE ENVIRONMENTAL IMPACTS FROM THESE COMMERCIAL OPERATIONS, is outrageous and stunning to think this is allowed WITHOUT ANY OUTSIDE OVERSIGHT!!

A RIGOROUS, TOTAL ENVIRONMENTAL IMPACT REVIEW MUST BE REQUIRED.
