Comments: Bolts are an integral part of climbing safety and are integral to the future of climbing. As climbing becomes more popular, providing the. Necessary equipment to increase safety for all users. Over my 15 years of climbing and 20 years being an environmental activist, I have never considered the use of bolts as adverse to my experience in the outdoors. Rather, using bolts in rock climbing has enhanced my experience and provided me with access to areas that could not be seen or experienced otherwise.

Thank you for the opportunity to provide comment.
