Comments: Safe bolting practices by conservation minded individuals is a low impact means of conservation providing relative safe access and erosion management in our wild places. Conservation and respect of wild lands is priority. Discussion on low impact methods of access and conversation need to be had methods need to be improved or further developed. Prohibition ends the conversation. Prohibition removes the ability to grow. . We need access to have maintain the relationship of love and respect with out world. Without access we will lose a fundamental component in our lives.
