Comments: I would appreciate if the following can be considered in your evaluation of FSM 2355 Climbing Opportunities #ORMS-3524.

Restricting the establishment of new routes to "existing climbing opportunities" on non-Wilderness lands is unenforceable and will create confusion amongst land managers and climbers. Non-Wilderness climbing management policy should maintain opportunities for new anchors unless and until analyses determine climbing should be restricted to protect cultural and natural resources.

Your consideration in this matter is appreciated.
