First name: Laurel
Last name: Gress
Organization:
Title:
Comments: Areas designated as Wilderness mean just that. They are places for nature, not people. Access by humans to designated wildernesses should be extremely limited and should primarily be for scientists, conservationists and other officially designated individuals who have an official reason to be there. They should not be open to the public. Random individuals cannot be trusted to maintain a wilderness area in the untouched state in which it is intended to be preserved.
