Comments: Fixed Anchors

Safety:

Fixed anchors vastly increase the safety of climbing that is already allowed in areas overseen by NPS. It allows for safer exploration of areas of the park.

Disallowing fixed anchors goes back on the policies that already have allows this, preventing unneeded safety risks. It would be a step back in wilderness safety. It would also pull enforcement resources to try and prevent people from increasing climber safety.

Please allow for the needed safety precaution of fixed anchors to remain on the lands.
