First name: Sharon

Last name: Furlong

Organization: Bucks Environmental Action

Title: spokesperson

Comments: It is beholden to the Forest Service to protect the natural resources placed under its domain as these are public lands . We are the overseers in these cases. And we cannot oversee anything, examine or question or applaud decisions made without public review. The use of renewals of leases and contracts without the publication of the application and the needed EIS statement on the impact of the intended lease or contract, is the absolute minimum needed for such review. In the situation we at BEA are concerned about, there is no capacity for review and it begs the question: what is being hidden? In this age of rampant distrust of government agencies and government actions, this is the exact wrong thing to do. You MUST NOT renew anyone for anything to be conducted in a Wilderness area without there being some explanation of how activities could harm the precious Wilderness this commercial organization is planning on using. The Forest Service sadly, has a long history of being in close alliance with commercial operations and entire industries and have allowed significant damage to the resources under your care, along with orchestrating events that became monumental losses for the American Taxpayer. This cannot be allowed to happen again. Your reputation is not stellar; it is incumbent on your agency to make sure you don't make mistakes like that again. Do NOT do make renewals in the Bob, or anywhere else, unless the commercial operator provide all information, and specific details regarding the nature, the extent of their operation, and what kind of impact it will have. These lands are ours, not yours, not any business, not any industry. Ours.
