First name: Robert

Last name: Higgins

Organization:

Title:

Comments: I am opposed to this. This is going to cause an unfunded mandate. It is economically impossible to remove all of the anchors in the environment. Firstly, people may actually die because of anchors failing. Secondly, this will cause damage to the rock and plants when people pull their ropes without using anchors. Finally, it will cause me to stop supporting the communities in the surrounding areas and this will amount to economic loss.
