Title:

Comments: Dear USDA,

Thank you for all you do to protect our planet's remaining invaluable green spaces. As you know well, there is nothing more urgent than keeping the world's ecosystems intact, to slow global warming and protect the ever-decreasing biodiversity that enables life on this planet. In that light I would like to add my name to the requests regarding the Bob Marshall Wilderness Complex, including:

*The Forest Service's responsibility is to preserve the wilderness character of the Bob Marshall Wilderness Complex, not to promote any particular use, such as outfitting/guiding.

*The Bob Marshall Wilderness Complex Outfitter and Guide Permit Reauthorization lacks site-specific information, despite requesting site-specific comments. Accordingly, the Forest Service must make the following information available for public review on its website and must also extend the public comment period for another 45 days after information is published on the website:

- permitted service days versus actual use for each permit
- annual inspections, performance evaluations, or public complaints related to each campsite or operator
- any NEPA documents and related decisions dealing with outfitting service levels or allocation in the Bob Marshall Wilderness Complex
- Campsite Management Plans for each outfitter camp

*Given the many impacts outfitting has on the Wilderness, the Forest Service must not use a Categorical Exclusion (CE) to renew any outfitter permits. An Environmental Assessment or Environmental Impact Statement with accompanying public input is called for to properly protect this fabled Wilderness Complex.

Thank you again for doing all you can to protect these important areas and their wildlife.

Sincerely,

Bryn Weller
