Comments: First, I thank the USDA/USFS for accepting public comments regarding the Bob Marshall Wilderness Complex. I'm writing to ask that the Service make every effort to protect true Wilderness character as it considers outfitter permits for this area.

The Bob Marshall Wilderness Complex Outfitter and Guide Permit Reauthorization lacks site-specific information, despite requesting site-specific comments. Accordingly, I ask, also, that the Forest Service make the following information available for public review on its website (extending the public comment period for another 45 days after information is published):

- permitted service days versus actual use for each permit
- annual inspections, performance evaluations, or public complaints related to each campsite or operator
- any NEPA documents and related decisions dealing with outfitting service levels or allocation in the Bob Marshall Wilderness Complex
- the Bob Marshall Wilderness Complex Character Narrative
- 2017 needs assessment and extent necessary documentation
- Campsite Management Plans for each outfitter camp

Given the many impacts outfitting has on the Wilderness, it is imperative that the Forest Service forgo the use of a Categorical Exclusion (CE) to renew any outfitter permits. An Environmental Assessment or EIS with accompanying public input is called for to properly protect this fabled Wilderness Complex.

Our few remaining wild places are more precious, irreplaceable, and vital to the health of life on Earth than ever. I thank the USDA/USFS for all they can do to protect the integrity of this one.
