Comments: I support the US Forest Service effort to identify, inventory, and protect old-growth forests. I support the proposal to amend all of the National forest management plans with individualized content.

I ask that the Forest Service work with partners on identifying credible old-growth forests on each national forest and national grassland. I would like to see more efforts on interpretation including webinars, publications, field trips, and other methods to involve the public.

Please keep in mind that a large percentage of the American public supports this effort.

Thank you!
