Comments: I request that the Forest Service include the Transportation System (roads and trails) as a key focus area in the planning process. I currently camp in the woods, and previously bow hunted in Eastern Washington and road my motorcycle on forest trails for many years. I am too old for hunting and riding motorcycles now, but I would like my 10 year old grandson to have the opportunity to enjoy those experiences as much as I did. Being able to access and use the outdoors for sport and pleasure has been wonderful for me. Please make including funding for maintenance and upgrades to roads and trails a planning priority.

Thank you.
