Comments: My life and my safety are very important to me and those who care about me, hopefully you will care about other people's safety and ability to enjoy the outdoors without unnecessary danger. If you care about the safety of others you will not pass this legislation. It will cause confusion, injury, and potentially deaths because of your decision. The documentation of climbing history is incomplete and limiting new routes to existing opportunities is a terrible idea. This have been working great, why change it?
