Comments: I am extremely concerned about the health and maintenance of our old growth forests. They are part of America's "lungs" and are a necessary part of President Biden's environmental president claim. Once they are harmed/removed they cannot be replaced. They are part of the Native American belief system.

Some of these are cut for use as toilet paper; surely we have other trees for that purpose.

This is not a scholarly report, but only they voice of a concerned citizen. Thank you for the opportunity to voice my concerns.
