Comments: Hello,

I have been climbing since the 90's along with whitewater kayaking, long distance backpacking. Have land just outside Yosemite and the proposal to limit stop Anchors and bolting in these areas will cause undue harm and danger for the community. With the history of climbers helping manage, maintain and often even work on SARS crews I would think our input and assistance would be valuable. Please look at the history of safe climbing and how we can work together for a safe climbing community working with the standards that you have already been practicing for 30+ years.

Thank you,
