Title:

Comments: It's the FS's responsibility to preserve the wilderness character of the Bob Marshall Wilderness Complex. An Environmental Assessment or Environmental Impact Statement, along with public input, is needed to protect the Wilderness Complex. Right now, the Wilderness Complex Outfitter and Guide Permit Reauthorization doesn't have site-specific information, so the FS should make this information available, and also give the public 45 more days to comment on it after it's been published.

Here's what should be published:

- permitted service days versus actual use for each permit
- annual inspections, performance evaluations, or public complaints related to each campsite or operator
- any NEPA documents and related decisions dealing with outfitting service levels or allocation in the Bob Marshall Wilderness Complex
- the Bob Marshall Wilderness Complex Character Narrative
- 2017 needs assessment and extent necessary documentation
- Campsite Management Plans for each outfitter camp

The FS also shouldn't use a Categorical Exclusion (CE) to renew any outfitter permits.
