Comments: I am assume you are under the influence of Bill Gates..who would like to cut down trees and bury them under guise of climate change. Why don't you leave our beautiful forests alone, they have existed for hundreds of years without your help.

Bureau of Land Management needs to be dissolved. The idea of you putting wind turbines on land is showing your lack of knowledge and the dangers they present for the environment, people and animals.

There is no climate change, this whole scenario has been created the Rockefeller, Gates, Soros, Rothchilds...it is all about control, and they certainly have control of your agency.
