Title:

Comments: Please allow climbers to use fixed anchors. There are many reasons and can provide a novel for why they should be allowed, but can provide short explanation for why they should be allowed.

Climbers promote environmental sustainability. Intentions are set for safety, not harming Mother Nature. They allow people to continue building a community centered around shared passions, with one being long term sustainability. Fixed anchors are not placed out of spite, but placed with intention.

PLEASE ALLOW US TO CONTINUE BUILDING AN ENVIRONMENTALLY COMMUNITY... we love earth just as much as you :)
