Title:

Comments: It's difficult to convey in words how silly this proposal is. To be brief, this will invite illegality, injury, and most certainly death. More importantly it is impossible to police such a proposal. Let's just stop this now before it gains any more traction. It's not worth delving too deeply into because of how utterly preposterous such an idea really is. This is the last thing in the world the federal government wants to take on.
