Comments: Prohibiting fixed anchors across the board is going to put climbers lives at risk and/or cause the creation of more trash, tat anchors as climbers will have no choice but to leave behind inferior gear to get down off of features safely. Truly thoughtless legislation that is going to do nothing but cause more safety issues and require more rescues etc as climbers will not have a way of rapping with no fixed anchors. Climbers will continue to use these spaces but in a manner that will make getting down safely illegal. The use of fixed anchors is as old as climbing and has been a tactic to reach some of the truly remote peaks in a fashion that falls within the limits of sanity.
