Title:

Comments: Our forest is life to us all, without them we will all suffer greatly, it boggles my mind to see humans still destroying the planet for greed and money, without our tree's our planet will continue to warm up and people will suffer, especially the children of the next generations, I feel like I'm dealing with clueless humans with no real knowledge of what is happening to the planet because of the really stupid things we do now! Stop the destruction of our forest, I live in Washington State, when I drive through the highway and I continually see clear cutting, not only is it an eyesore but beyond that, the destruction and the chemicals they use after words, these things are simply heart breaking to see.
