Comments: Climbing has changed my life in such outstanding ways. Before making the move to AZ for new job opportunities I was living in OK with little resources or access to the wilderness. I was going down a really bad path at the bars almost every night because it seemed like the only thing I had available.

Once I moved to Tucson and was introduced to the easily accessible climbing on MT Lemon I was able to get sober and have never been more mentally and physically fix. I have a thriving group of friends all of which are climbers and are out every weekend using these anchors and bolts to better ourselves. This have become more than a hobby and into a lifestyle of getting stronger and being in nature.

Please keep Climbing safe and accessible for current and future climbers in need of this outlet, and keep our community thriving.
