Comments: Hello, i am writing to offer my opinion on this bill. While not altogether opposed to offering guidelines to agencies to manage climbing areas, any such guideline that would unilaterally provide fixed anchor management authority exclusively to supervisors is flawed. Currently, most of this management is performed onsite when unsafe conditions necessitate replacement of fixed anchors, so that follow-up climbers who may not have spotted the danger aren't put in risk. This proposal as is would prohibit such activity and as such i cannot support it and voice my opposition to this bill.
