Comments: Hello, I implore review of the "Evaluation and Authorization Procedures for Fixed Anchors and Fixed Equipment in National Park Service Wilderness Areas" draft in conjunction with with consultation and collaboration with credible representatives of the climbing community. The draft seems to not address many "what if" scenarios that do not benefit any of the affected parties of this draft. I agree that proper oversight of anchors within the wilderness is needed however the process by which this should happen needs guidance from those who will use them and not just see them. Thank you for your time.
