Last name: Wilson

Organization:

Title:

Comments: To whom it may concern: I am in favor of allowing Climbers and Cave Explorers to use their best judgement in the placing of Bolts, Slings and Anchors, Pitons, Cams, other Protective equipment in order to provide safest possible exploration of new or old routes. This hopefully can prevent the need for expensive Rescue Call outs which inevitably create more serious and long lasting environmental impact. Quit harassing small user groups of Taxpaying Citizens. Focus instead on the bogus Scientists who claim it is necessary to cut Timber in a Slash and Burn fashion on The Buffalo Springs Forest unit in Indiana when the World so desperately needs more Carbon sequestering Older growth Trees on the people's resource.
