Comments: Hi there. I am concerned about FSM 2355 Climbing Opportunities #ORMS-3524. As seen in Daniel Boone National Forest and bolt replacement efforts in Hueco Tanks State Park, when entities other than climbers are responsible for saying yes or no to bolting/fixed anchors/replacing hardware routes do not get fixed for years. These routes become unnecessarily dangerous. A person who has never been an avid outdoor rock climber is incapable of making reasonable decisions about climbing hardware placement. Also, as a girl who learned to climb in the Ozark National Forest, this law I wildly unenforceable. Let climbers run our own sport please, we are an excellent user group. Thank you!
