Title:

Comments: National forests offer many recreational activities and rock climbing is the one activity that has been the most impactful in my life. Each year I travel to Pisgah NF, Linville Gorge, Looking Glass Rock- and these areas hold a special place in my heart. And I hope that when my son gets older we can share in these experiences together.

Fixed Anchors keep climbers safe and secure. Without maintenance and proper protection rock climbing will be severely affected for future generations.

Please help us to ensure climbers can continue to recreate safely by allowing proper maintenance of climbing anchors.
