Comments: Hello I am a climber and my favorite place in the world is mount Lemmon, but I love taking vacations to national parks to experience all of the incredible different environments this world has to offer. Everyone interacts with this world in a different way and the way my aunt experiences nature is through climbing. And as I got older I too grew to love and respect nature through the lense of climbing. And as my niece gets older I hope for her to experience this world in the same way as her olders. At the root of climbers is a love and respect for the nature around them. And bolts help keep us safe and able to respect nature the way we have for generations. Please let us keep bolts so Daphne can be as safe as possible. Thank you
