Comments: I understand there's a plan for the Bob Marshall Wilderness to renew the permits of 62 outfitters for at least ten years.
I request that information be provided about annual inspections and public complaints on the public website. I request that the renewal process be done with Environmental impact statements or environmental assessments, rather than a Categorical Exclusion.
I ask that the process reflect the Forest Service's job of preserving the wilderness character of "the Bob" and not promoting any particular use such as outfitting or guiding.
