Title:

Comments: I am Italian, not American, but as an inhabitant of this wonderful planet I hope that the project to protect the ancient forests of the United States from felling can be implemented and that the United States becomes an example for all other countries.

I think that the industrial system (and all of us) around the world can (and should) do without exploiting these forests.

With gratitude for what you will do.

PS I learned about this initiative of the Biden administration from the More Than Just Parks newsletter

Sincerely

Diego
