Comments: Thank you so much for this positive plan moving forward to protect Our mature forests and old growth trees. We must as a nation assign to these forests a huge (monetary) value for the incredible benefits they provide in the way of helping to stave off and/or mitigate the major negative effects of the changing climate. The benefits these intact forests provide far exceeds any short-term gain a logging project might provide. There is no more time for such costly mistakes.

Please increase and make permanent protections for our old growth trees and intact forests for our future generations and shared world.

Thank you!
