Comments: Outfitter operations can have outsized impacts on wilderness if too many or too large operations are permitted. They must be monitored and inspected to protect the nature of wilderness as the law requires. The proposed extensions in the agency's scoping letter lacks important information, such as annual inspections and public complaints, and on top of that, the agency proposes to approve the renewals with a Categorical Exclusion (CE), rather than go through a more rigorous environmental review. This shuuld NOT go forward in this condition.
