Comments: Re: Land Management Plan Direction for Old-Growth Forest Conditions across the National Forest System

After reading the document describing this plan to conserve and steward trees in the National Forest System, I support this action. There are many benefits to the environment to have these trees maintained. The inspections could prevent disasters caused by insects and diseases to trees. The inspection could also help prevent the spread of wildfires. We need trees to improve our air quality and provide environments for wildlife. People enjoy spending time in the forest hiking and camping. They also enjoy driving along highways that are cut through these beautiful forests. Let's protect the trees.
