Comments: I am concerned about your plans to renew 62 special use outfitter permits. Specific public information on these permits is lacking. I would ask you to be transparent on the site specific information. No agency that has the ability to effect the stability of wildlife and our wild places should be anything less than transparent. The Forest Service's responsibility is to preserve the wilderness in this area, not to serve the interests of the people who want to trample it. Given the many, many ways this could go very wrong, I would also ask that the permits are not renewed with a CE as opposed to a a thorough environmental review. Pushing through these permits with anything less is irresponsible.
