Title:

Comments: YES! YES! YES!

I write to STRONGLY SUPPORT your proposal to improve the conservation and management of America's old-growth forests!

These precious natural forests:

- *are one of a kind

- *can never be replaced once gone

- *stabilize their environment

- *sequester carbon

It's vitally important that we do everything in our power to ensure that they survive and thrive!

I STRONGLY SUPPORT YOUR INTENTION TO:

- *prohibit management activities that degrade old-growth forest conditions,

- *protect our remaining old-growth forests from industrial logging

- *encourage and promote management that aims to combat climate change impacts

- *reduce the risk of abnormally severe and destructive wildfires in fire-prone forests.

IN ADDITION, PLEASE QUICKLY PROPOSE AND ADOPT AN OLD-GROWTH FOREST POLITY THAT sets out complementary, durable regulatory direction for conserving and recruiting old-growth forests, AND promotes tribal co-stewardship along with integration of indigenous knowledge of forest management.

Thank you for your care for the health of America's natural environment, and for your diligence in making sure our old-growth forests survive and thrive!!!
