Comments: I am writing in regard to proposed rule Land Management Plan Direction for Old Growth Forest Conditions Across the National Forest System #65356. This important document protects old growth forest. Unfortunately, it neglects to mention Mature Forests which also need protection. Due to extensive logging in the past, the nation has a limited amount of Old Growth Forest, relative to the amount of reforested areas that have matured into Mature Forest, especially in the eastern United States. Together, Old Growth Forest and Mature Forest need protection to address the climate crisis and counter our diminishing biodiversity. Please add protection for Mature Forest to this Land Management Plan Direction #65356. I support the Land Management Plan Direction once this addition is made.
