Last name: Clapp-Itnyre

Organization:

Title:

Comments: Please save old-growth forests in the Hoosier National Forest and other IN forests. And do not allow controlled burns:

*old-growth forests are the BEST at mitigating climate change and absorbing carbon

*old-growth forests represent decades and centuries of growth, and cannot come back overnight

*old-growth forests of IN are some of the most beautiful in the country, and add to tourism of our state; we ourselves head to southern Indiana on a regular basis to enjoy the forests

*controlled burns are not necessary in one of the most temperate states in the country. Forests, when left alone, die and replenish in their own, most-effective ways.

Strengthen the proposed measure to reflect true environmentalism and respect of nature.

Signed,

Alisa Clapp-Itnyre
