Comments: As a lifelong "forest kid," who also raised all 5 of her children to be the same, I wholeheartedly support the amendment to all land management plans for units of the National Forest System to foster the long-term resilience of old-growth forest conditions and their contributions to ecological integrity across the National Forest System.

For years we have seen rampant wildfires throughout this country and others. It is past time we look for ways to mitigate these risks.

I especially appreciate the recognition that different geographic locations will need different approaches in management.
