Title:

Comments: Please consider the integration of young adults in the US, as a workforce capable of replacing the current reliance on Latinx communities in unfair and poorly compensated working conditions. Please consider consolidation of environmental policies in this plan amendment, rather than the addition of policies that are often out of line with practical implementation on local units. This plan should assess the capacity needed to proactively treat the landscape, and propose a realistic pipeline for early ecological education and training for youth, as well as Tribal access and authority to conduct traditional practices on public lands throughout the pacific northwest. Thank you for your consideration of these important aspects of public land stewardship.
