Comments:

Making this closure permanent is unnecessary. The current closure isn't used for the entire 90 days, why would Brundage need a permanent closure?

The boundary in itself has no good natural markers making this very hard to manage and in-force.

I think the closure should be canceled completely. Extending this closure is only good for Brundage. Snowmobilers and back country skiers are being shut out of public ground for the benefit of a private business.

As Idahoians we already have to tell our children "I remember when that was a field" don't make us now have to tell our children " I remember when we could ride there"
