Comments: Hello,

I work in Arboricultur, focusing on climbing to preserve trees within our landscapes. I am passionate about the work I do. If we do not save our old growth forests throughout the world we will destroy our rapidly changing environment and the balance will be completely lost. These forests are what is keeping us from becoming a ball of flames. We need to step up our management as a species for the sake of mankind and realize that they **MUST NOT** be destroyed and **MUST** be protected. For the future of earth to be habitable for humanity and all other life on the planet.

We need to Protect our Forest! **ESPECIALLY OUR OLD GROWTH FORESTS.**

Thankyou

Sean
